THE PLAYER GUIDE
HOW IT WORKS

The team handbook on everyone's phone: what it does, how to get in, and how to change anything in it.

NEW SINCE THE FIRST VERSION

Daily notes come first
The day's plan now sits at the top of Today.

The new game plan
Coach Warner's offence and Ashley O'Brien's defence, laid out like their slides. Page 3.

Weather
Hour by hour, games marked, a rain map, °C or °F. Until the tournament, Today shows today's. Page 3.

More ways to lay out a page
Labelled boxes and green bottom-line bars. Page 5.

1 WHAT THE APP IS

The Player Guide is the team handbook, on everyone's phone. It replaces the Google Doc: everything a player needs for a tournament is in one place, and it's always up to date.

- **Players** use it to check the day's plan, the schedule, who to call, where to go, what to pack, and the coaches' game plan.
- **Staff** can change anything in it from their phone. Players see the change the next time they open a page. Nobody has to download anything.
- **It works with no signal.** Each phone keeps a copy, so the guide still opens on a plane or abroad without data.
- **One guide per tournament.** When a tournament ends, staff start the next one and copy over what stays the same, like staff, the roster and the packing list.

2 GETTING IN

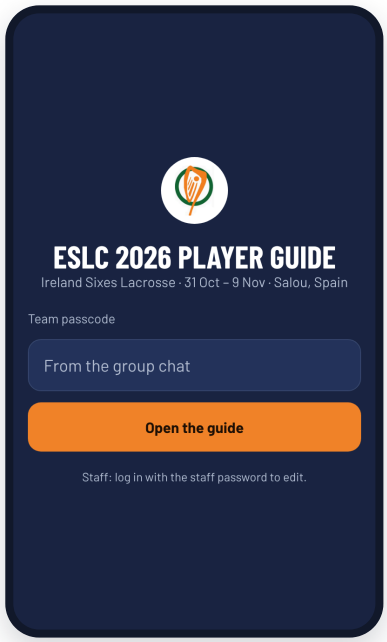

Open **eslc-player-guide.vercel.app** in your phone's web browser. You'll see one box to type into. What you type decides what you can do:

Team passcode

For players. They can read everything, but can't change anything. It's shared in the team group chat.

Staff password

For coaches and staff. Lets you edit the guide. Tom sends it to you privately. Please never post it in the group chat.

The login screen. Type the team passcode or the staff password.

Put it on your home screen

Then it opens like an app:

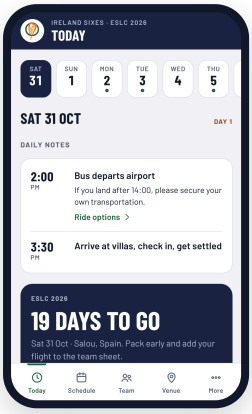

- **iPhone (Safari):** tap Share, then **Add to Home Screen**.
- **Android (Chrome):** tap the ⋮ menu, then **Add to home screen**.

You only log in once

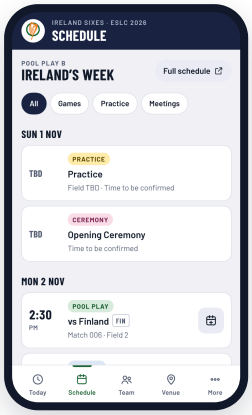

The phone remembers you. Players are only asked again if staff change the team passcode.

3 WHAT PLAYERS SEE

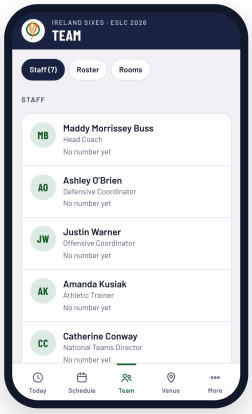

There are five tabs along the bottom of the screen. All times are local time where the tournament is.

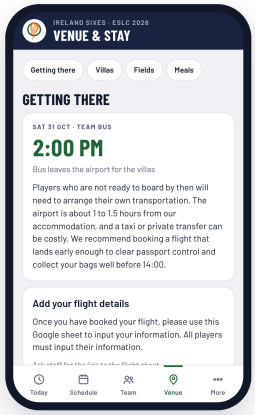

Today

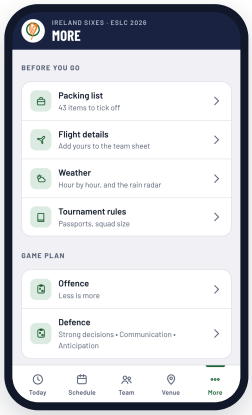

Schedule

Team

Venue

More

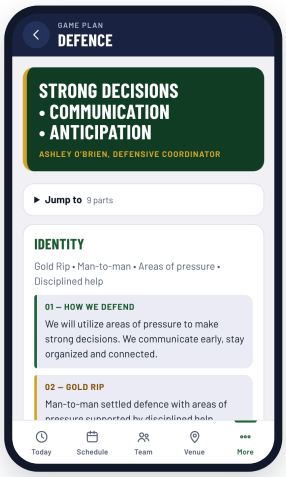

Today	The day's plan comes first (buses, meals, meetings, games), then the countdown, the next game and the weather. An alert banner shows at the very top when staff post one. Tap the days along the top to see another day. **Quick links** at the bottom include **Offence** and **Defence**.
Schedule	Every game, practice, ceremony and meeting. Players can add one game, or **Add every game to my calendar**.
Team	Staff, with **Call** and **WhatsApp** buttons once a number is added, plus the roster and the rooming list.
Venue	The airport bus and other ways to get there, the villas, the fields, maps and meals.
More	Packing list (ticks are saved on each player's own phone), flight details, **Weather**, the **Game plan** (offence and defence), tournament rules, conduct, the anthem and useful links.

The game plan

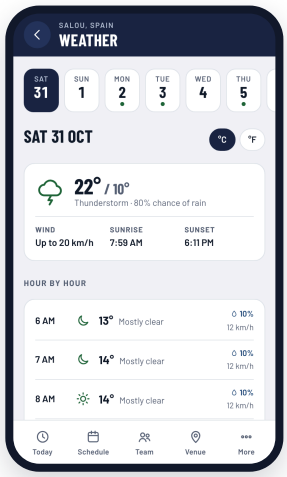

The coaches' offence and defence principles, laid out like their slides: a card per slide, ending on its key line, and **Jump to** at the top. Players open it from Quick links on Today or **More → Game plan**. It works offline.

Weather

Hour by hour for each day, with games marked at the time they start, plus a rain map: the forecast, or the radar, which only shows rain falling right now (tap **Show the rain map**; it needs signal). It's on Today and under **More → Weather**. Each phone can show °C or °F. Forecasts reach about 16 days ahead, so the tournament's days fill in about two weeks before. Until then, Today shows today's weather there.

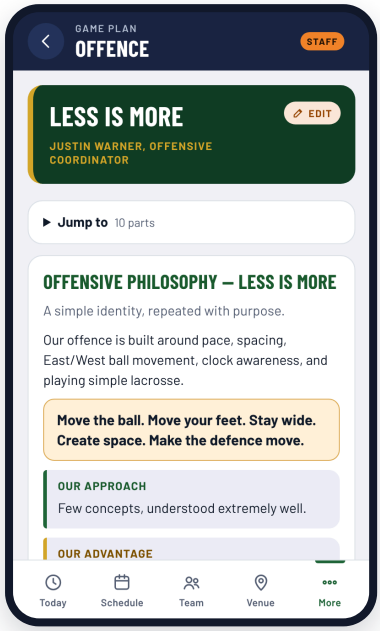

Game plan

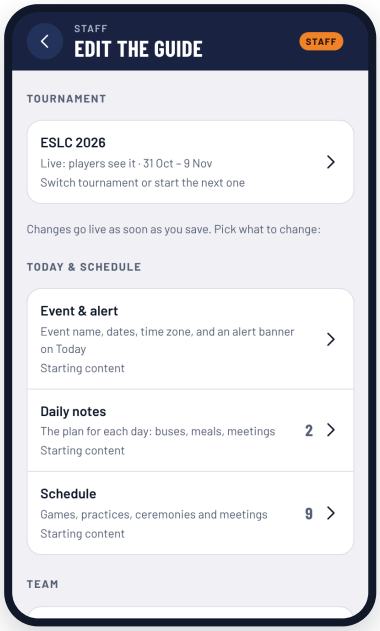

Weather

4 MAKING CHANGES

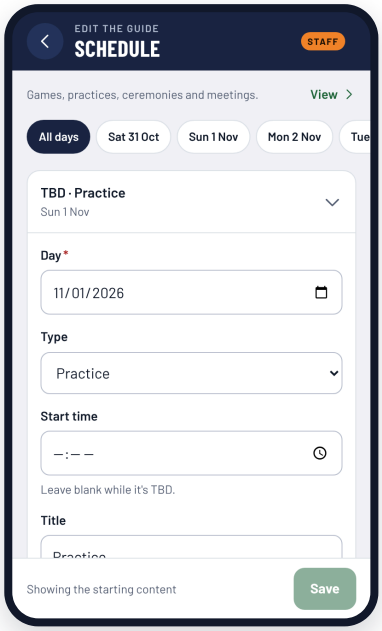

Log in with the **staff password**. An orange **STAFF** badge shows at the top, and orange **Edit** buttons appear on anything you can change.

Edit buttons appear on pages for staff only.

More → Edit the guide lists everything you can change.

Tap an item to open it, change it, then **Save**.

Two ways in

1. Tap **Edit** next to the thing you want to change. It opens straight to that item.
2. Or go to **More → Edit the guide** for the full list, grouped as Today & schedule, Team, Venue & stay, and More.

In the editor

- Tap an item to open it, change the boxes, and tap **Save** at the bottom. When it says **Saved**, players will see the change the next time they open a page.
- To add something, use the **Add a ...** button under the list. To remove something, open it and tap **Delete**; it asks you to confirm. Use the arrows to change the order.
- A box outlined in red needs fixing, and the message under it says what to do.
- If two staff edit the same thing at once, the second person gets a warning instead of wiping out the first person's work.
- No signal? Your changes stay on screen. Tap Save again once you have signal.

This guide, in the app

The latest copy is always at the bottom of **Edit the guide**: tap **Coaches' guide** to read it or share it.

4 MAKING CHANGES: COMMON JOBS

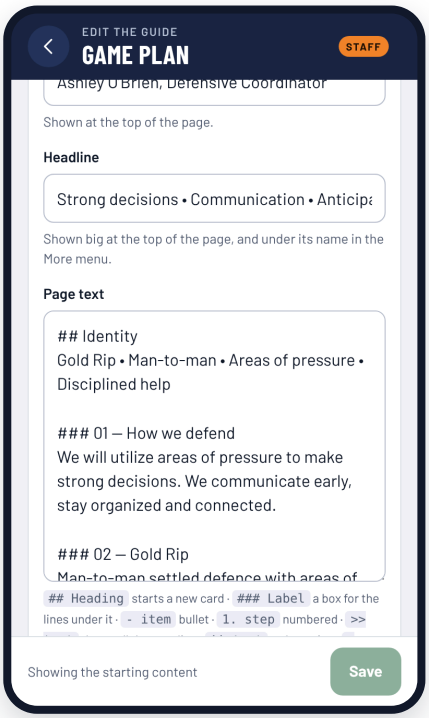

TO…	IN EDIT THE GUIDE, OPEN…
Post tomorrow's plan (buses, meals, meetings)	**Daily notes**. Pick the day, then **Add a note**. It shows at the top of Today. Leave the time blank if it isn't set; players see *TBC*.
Change a game time, field or opponent	**Schedule**
Put an urgent message at the top of Today	**Event & alert** → **Alert banner**. Clear the box to hide it again.
Update the offence or defence	**Game plan**, or tap **Edit** on the page itself. **Add a page** adds another topic, like draws or clears.
Add a staff phone number	**Staff**. Include the country code (+353, +1…) so Call and WhatsApp work abroad.
Add or change players	**Roster**, and **Rooming list** for who's in which villa
Replace a map or photo	**Maps & photos**. You can pick from your camera roll.
Change rules, conduct or activities, or add a new page	**Pages**
Change the town the weather is for	**Event & alert** → **Weather town**. Blank uses the tournament's location.
See, share or change the team passcode	**More** → **Team passcode**. Changing it asks every player for the new one, so share it in the group chat. Staff stay logged in.

Writing pages and the game plan

Pages (rules, conduct, activities) and the game plan use a simple text format. A reminder is shown under the text box:

`## Heading`	Starts a new card
`### Label`	A labelled box for the lines under it
`- item` `1. step`	A bullet point, a numbered step
`>> text`	The card's bottom line, in a green bar
`**words**`	**Bold**. A line all in bold is highlighted.
`!! text` `> text`	A red warning, a grey note
`[label](https://…)`	A link

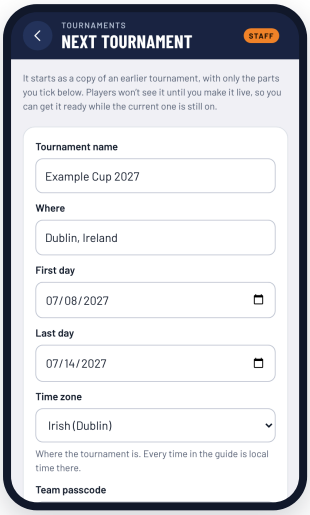

Leave an empty line between paragraphs.

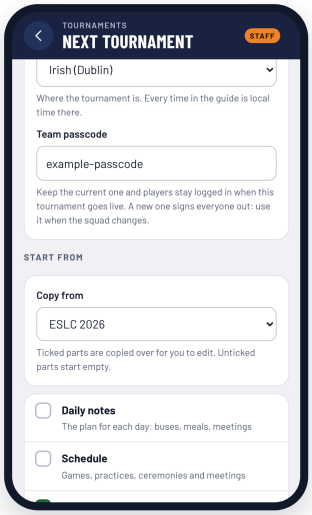

Editing the Defence page

5 STARTING A NEW TOURNAMENT

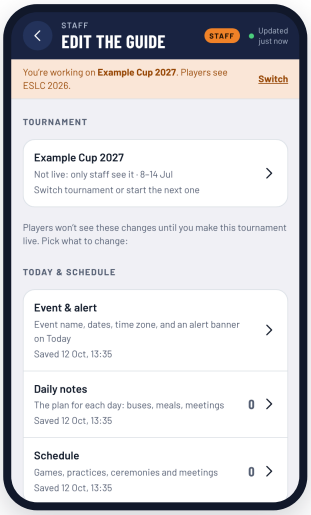

Each tournament gets its own guide. You get the new one ready while players still see the current one, then switch everyone over in one tap.

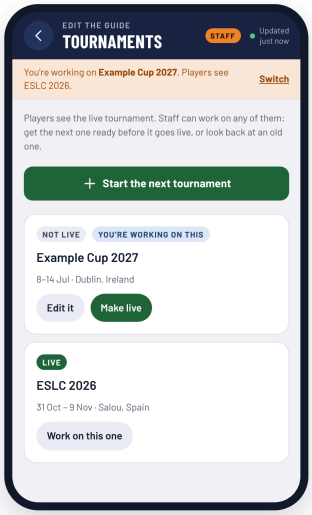

Step 1 · the details

Step 2 · what to copy

Step 3 · the orange bar while you work

Step 4 · Make live

1 Fill in the details

Go to **More → Tournaments → Start the next tournament**. Add the name, where it is, the first and last day, and the **time zone**: every time in the guide is shown in local time there. Choose the **team passcode**. If you keep the current one, players stay logged in; a new one signs everyone out.

2 Choose what to copy

Pick a tournament to start from. Ticked parts are copied over for you to edit: staff, roster, packing list, pages, game plan, anthem and links. Everything else starts empty: schedule, daily notes, travel, villas, venue, maps, meals and rooming. Tap **Start the tournament**.

3 Get it ready

The new tournament is a draft that only staff can see. An **orange bar** at the top says which one you're working on and which one players see. Edit everything as usual; players still see the current guide. Tap **Switch** on the bar to move between tournaments.

4 Make it live

When it's ready, open **More → Tournaments** and tap **Make live** on the new one. Players see it the next time they open the guide. If the passcode changed, post the new one in the group chat first.

Old tournaments stay

Past tournaments stay in the Tournaments list, so you can look back at them or copy from them later. Players only ever see the live one.

6 GOOD TO KNOW

Do players need to update or refresh anything?

No. The guide updates itself whenever they open it with signal.

Who can see what?

Anyone with the team passcode can read the whole guide, including staff phone numbers. Don't put anything private in it, like passport numbers or medical details. Only people with the staff password can make changes.

Can I see which players have read something?

Not yet. Everyone shares one team passcode, so the app can't tell players apart. To check, ask in the group chat.

I made a mistake. Can I undo it?

Before you save, just leave the page. It asks first, then drops your changes. After you save, change it back and save again.

Someone forgot the passcode

Staff can always see it under **More → Team passcode**, with a button to copy it.

Can the staff password be changed?

Yes, but only Tom can change it. Ask him if you think it has been shared too widely.

What do "Saved copy" and "Offline" mean?

The phone is showing the copy it saved last time, so the guide still opens with no signal. It updates by itself as soon as there's signal.

A player says the guide looks wrong or old

Ask them to open it with signal and wait a few seconds. If the top right still says **Offline**, their phone has no connection. If something still looks wrong, contact Tom.

The weather is for the wrong place, or won't show

It uses the tournament's location. To pick a different town, set **Event & alert → Weather town**. If it says the forecast isn't available, try again in a few minutes.
